PROGRAM DESCRIPTIONS

Ambulatory Rehab Program – as part of South Niagara Health and Wellness Centre: A general adult ambulatory rehab program designed to improve functional independence for patients at risk for hospitalization or requiring a greater level of care. Located at Gilmore Community Hub, Fort Erie, this program is a component of a multi-agency, interprofessional program.

Audiology & Hearing Aid Clinic: Hearing tests for adults and children (6 mos+); Hearing aid prescriptions, sales and support; Custom hearing protection; Auditory Processing Disorder evaluations (APD 7 yr+).

Augmentative and Alternative Communication (AAC) Clinic: Explores the use of technology when speech, language, or handwriting do not meet daily communication needs. Services include: assessment; prescription; application for financial assistance; and provision, training and support of communication aids for adults (18yr+).

Cancer Rehab Program: For clients who are at any stage of their treatment or have been identified being at risk for functional decline post cancer treatment. Team can include Physiatrist, Physiotherapist, Occupational Therapist, Nurse, Kinesiologist and Rehab Assistant.

CNS Neurology Program: For clients with a central nervous system (brain or spinal cord pathway) diagnosis, may include Multiple Sclerosis, spastic paraparesis, brain or spinal cord tumours, spinal cord injury and ABI. Exceptions made for Guillain-Barre Syndrome. Team can include Physiotherapist, Occupational Therapist, Speech-Language Pathologist, Social Worker, Nurse, and Registered Dietitian.

Orthopedic Programs:

Amputee Program: Specialized rehabilitation services including assessment, treatment and preventative measures for lower extremity amputees.

Hand & Upper Extremity Program: For patients with arm/hand injuries or post-operative diagnoses including joint / tendon / nerve / fracture repair or reconstruction. Referrals for custom or commercially available splints accepted from specialists.

QBP Joint Replacement Program: For post-operative joint replacement management.

Parkinson's Rehab: For clients diagnosed with Parkinson's disease. Team can include Physiotherapist, Occupational Therapist, Speech-Language Pathologist, Social Worker, Nurse, and Registered Dietitian.

Speech-Language Pathology: For adults (18 yr+) with recently acquired disorders of speech, language and cognitive-communication. We do not accept referrals for voice or swallowing.

Stroke Program: For clients recovering from stroke. Team can include Physiotherapist, Occupational Therapist, Speech-Language Pathologist, Social Worker, Nurse, and Registered Dietitian.
